

Eric Rubottom of Wabaunsee High School stares at a computer screen hoping to figure out a programming problem.

High school students from around

solve all of them," said David Gustafson. "We try to have problems so that teams solve at least one of them."

The rounds may have been all business, but in between it was literally fun and games. Several teams would play video games after completing the prob-

Teske, 15, competed for Wamego High. Wamego High School finished with 71 points.

"It was a little bit more difficult because we haven't had as much practice in Pascal," said Charlie Kilian. "It was more fun."
